**LOCAL
SUSTAINABLE
PLANS FOR HEATING
AND COOLING –
SHAPING RESILIENT
MUNICIPALITIES**

Plan4Cold aims at supporting South European municipalities to comply with the obligation set in the Energy Efficiency Directive (EED) for municipalities with more than 45.000 inhabitants to prepare local heating and cooling plans (LHCPs). Given South European cities specific challenges such as rising cooling needs, inefficient building stock and decentralized heating infrastructure, Plan4Cold will provide methodological guidelines, resources, tools, capacity buildings initiatives and active step-by-step support to define the LHCPs.

Plan4Cold is working with 17 municipalities in Greece, Portugal and Italy to develop sustainable heating and cooling plans. Further, two associated municipalities in Croatia and Spain will profit from the experiences of the pilot cities, replicating the Plan4Cold process in two cities.

Plan4Cold in a nutshell:

Duration: October 2024 – September 2027

15 project partners

Funded by the LIFE Programme of the European Union
